The Brain Injury Program at HEALTHSOUTH Rehabilitation Hospital of York provides a comprehensive acute rehabilitation program, which is dynamic and patient focused. Brain injuries are often complex and patients can benefit most when treated in an environment designed to promote optimal recovery with attention to safety and individuality. Our multidisciplinary team of highly trained and experienced nurses, therapists and psychologists led by our Associate Medical Director, Dr. Daniel DeFalcis, MD, are dedicated to developing specific treatment plans that are sensitive to the patient and their family. The specialized Brain Injury Program provides the latest interventions to promote patient safety, and an environment that controls levels of stimulation to maximize patient outcomes.
